COMMERCIAL FLOOD

FusionX Flood Light

Bright, wide-beam output from the FusionX Flood Light covers a yard, sign, facade, or building perimeter in even, consistent light. The compact 15W and 28W models are field-selectable across five color temperatures, so one SKU covers multiple spec requirements and cuts stocking complexity, while the higher-output 50W and 80W models add smooth 0–10V dimming to tie into building controls at a fixed 4000K. All install in minutes with standard hardware and run efficiently against higher-wattage legacy floods — a full ladder of output from a small entry up to a large facility perimeter.
